A Citizen's Obligations.

"The private citizen, no less than the public official," said the report of the Council Investigating Committee, "owes to the community in which he lives the best exercise of his political influence, and when he accepts compensation for the use of that influence in any particular direction, he does an injury both to himself and the public."

That means that the private citizen should not accept compensation for the use of his influence in promoting any public measure, before the Council, which is all right as far as it goes. But that is merely negative. The private citizen owes far more than this to the community in which he resides. It is a great privilege to be an American citisen, but citizenship is something more than a privilege. It carries with it grave duties and responsibilities and sacred obligations, which are binding every citizen. A good citizen is not a mere negative quantity, a man who simply does nothing against the government. Nor is it the whole of good citizenship to respect and obey the laws. The good citizen should be a positive and active force in the affairs of government, and he should exert his influence to promote good government. He cannot in duty live to himself apart from the activities of political life and leave political affairs and the affairs of government to be carried on by oth-

It has become a trite saying that a citizen may be a good man, but a poor citizen. He may be moral and upright and honest in his dealings; he may be faithful to his family relations and live up to the moral code, and yet fall far short of the duties of citizenship. Neglect is inexcusable in any relation of life, and is inexcusable in the matter of civic duties. In a government like ours, it is especially necessary that good citizens take an active part in public matters. The good citizens of Richmond are in the majority, and they can control political affairs and put representative men into office and keep bad men out of office, if all good citizens will cooperate to that end. But there are so many good and influential men in the community who neglect the duties of citizenship, that our government has upon occasions gone to the bad, and when it is discovered that there has been wrongdoing no persons are more pronounced in protest and condemnation than the men through whose neglect the abuse came.

It seems to us that it is now a good time for every citizen of Richmond to have an honest understanding with himto ask himself if he is a good citizen, if he is discharging faithfully the duties of citizenship, and to answer that question frankly and honestly to his own conscience. A man may shirk a sponsibility, but he cannot escape its obligations.

Taxation as a Blessing.

The State of New Jersey receives such a large revenue from the taxation of corporations that it is unnecessary to impose any State tax whatever upon individuals Notwithstanding that fact, Governor Murphy, in a recent message to the Legislature, expressed the opinion that every citizen should be required to pay a special poll tax, large enough to remove the temptation from any political party to pay it for him Most of us are disposed to think that taxation is a curse, and the reader will doubtless be puzzled to understand why Governor Murphy advocates a special tax on individuals, when the government does not need the revenue. But Governor Murphy gives a sufficient reason citizens would value the privilege of residence in New Jersey more highly if they shared directly in bearing the burdens of government - And the Governor 'ls right. Nothing helps a man's interest in any institution with which he is associated quite so much as a pecuniary investment therein.

The churches long ago made this discovery for themselves, and out of it grew the envelope system of collection. At the beginning of the church year, each and every member is given a package of fifty-two envelopes, accompanied with the request that he return one envelope for each Sunday, inclosing the contribution for the week. This is done, we repeat, not simply as the test means of raising revenue, but as the best means of stimulating interest

It may be argued that such a scheme appeals to the baset nature. However that may be, the fact is that when one's interest is thoroughly aroused, it then becomes a comparatively easy matter to appeal successfully to the higher na-

celve according to the cost of it. We do not set high value upon those things which we receive for nothing. When a man pays taxes for the support of government, for the privileges of citizenship, he is more apt to set a high value upon his privileges than when he receives them from year to year without any cost whatever.

War on Pneumonia.

Dr. A. C. Abbott, chief of the Health Bureau of Pennsylvania, said in a recent aldress that pneumonia was a contaglous disease, and that the Board of Health had the right to calssify it as such. "When this is done," he added, "the bureau will notify all physicians to report every case of pneumonia to the authorities.

"The department will then start an investigation into the causes for the spread of the disease that will lead to the adoption of measures to check it. The cold and dirty street cars are mainly responsible for pneumonia."

The mensure, it is understood, that the Board of Health will consider to stamp out pneumonia will include the cleaning of all public buildings, so that they may be made, if possible, entirey sanitary; a rigid enforcement of the law requiring the cleaning of snow from sidewalks; the proper ventilation and cleaning and hearing of street cars, and the enforcement of the prohibition against expectoration on the sidewalks or any place close where infection may be caused.

Science is making great progress in fighting disease, and too much attention cannot be paid to the subject. Human life is very precious, and all that can be done should be done to stamp out disease and promote health and prolong

This subject should receive the special attention of the Virginia Legisature, as that of the local legislative bodies throughout the State.

A Wail From Pennsylvania.

A Wail From Pennsylvania.

The move in Maryland to disfranchise negroes, following upon disfranchisement in Virginia, is not without peril to the people of Pennsylvania, if as a result of it there shall be a further African invasion of this State. Our heavy negrovote is already a political misfortune, contributing potentially toward the con-tinuance of misgovernment. It is also an undeniable fact that the safety of life and property has been put at greater hazard in the southern and eastern counties of Pennsylvania by the drift northward of an undesirable negro ele mont. It is quite possible that in the near future the people of this State may be obliged to take measures to protect themselves against further African in-trusion.—Philadelphia Record.

Isn't that entertaining? Is it, indeed, possible that the North will by and by put up the bars and keep the negroes out of their territory? Hardly. But of this we feel sure: If the negro vote dees grow large enough to become a distinguishing factor, as it has been in the South, the North will deal with it as the South has dealt with it. The negro question is the same everywhere, conditions being the same.

A writer in the Bultimore Herald states that the cost of asbestos curtains -"the real thing"-is from \$150 to \$250 each, and he adds that the only thing which prevents their extensive use is that theatre owners are unwilling to pay for this material, but content themselves with the "so-called safety curtain, which is sold at a half or a third the price of the asbestos curtain-these misnomers being made of heavy jute, cotton or textile material washed over

We are told that in some cities not even the asbestos curtains are accepted as satisfactory. A sheet iron curtain is demanded. But if the asbestos curtain is to be used at all, the authorities have had warning enough in the Iroquois fire not to permit anything but the best to be put up.

with paint."

The people of Georgia have resolved that General John B. Gordon shall have a monument and the work of collecting funds therefor has been begun. It is expected that it will be completed in a year. Help is counted upon not only from every other Southern State, but from hundreds of persons in the North who knew the General as "the great pacificator."

The proposed monument includes an equestrain statue, and it will be placed on the State House grounds,

The country has suffered as a result of the Democracy's weakness and lack of union in the defense of the party's time-honored principles. The Republicans have abused their power wilfully believing and trusting that they could not be held to account. We doubt not that the really particite element in that party, represented by such thoughful men as Sentor Hoar really wish to see the Democracy once more united and sound in order to serve as a circle on the party in power. Senator Deltrich, of Nevada, has been acquitted on a ruling from the judge presiding over his trial, that the bribery charged on him was committed between the time of his election and his qualification, when, as the judge decided, he was not amenable as a memor of Congress. This is, perhaps, sound law. But, unfortunately for the senator's reputation, the distinction is too nice for the average man to draw, And only a clear case against him, it will me held, would have caused his lawyer to take advantage of such a shaded plea.

DR. BOWDOIN REPLIES.

He Denies Charges of Mr. Matthews and Courts Investigation.

thews and Courts Investigation.

Editor of The Times-Dispatch:

Sir,—Please give space to the following reply to the letter of Mr. S. Wilkins Matthews, dated January 6, 1994, and published in your issue of January 8, 1604, which letter I had not seen until last Saturday night. I take up Mr. Matthews' charges in the order in which he makes them:

thews' charges in the order in which he makes them:

1st. 1 did say that the information that Mr. Mathhews had polled the Legislature as between Senator Martin and Governor Montague, came from Governor Montague, but it did not come by letter; Governor Montague wrote me no such letter, and I never told Mr. Matthews or any one else that he did, and no reputable man can truthfully say that I ever said that I ever had such a letter from Governor Montague.

2d. I did use my personal influence to defeat Mr. Matthews, but did not use my official influence either as county chairman of Accomac county, or as chairman of the Board of Fisheries to defeat him.

chairman of the Board of Fisheries to defeat him.

It is not true that my "personal, political and official friendship for them" (oyster inspectors and others) "depended on their voting against" Mr. Matthews, nor did I by act, word or deed give any of such persons, or any voters in Accomac county, any grounds for thinking, believing or understanding such a thing. In regard to the judges in the primary at Tangier Island, I saw Inspector W. D. Dise, who had acted as judge for a number of years, and who was a supperter of Mr. Matthews' opponent, and told him I should appoint Mr. Joe Daly to act in his stead, explaining that I did so because Mr. Dise was inspector and some objection and criticism might arise on that account. Captain J. H. Costin was appointed as the other judge there. Neither Captain Costin nor Mr. Daly is in the State cyster service, nor connected with the State Board of Fisheries as inspectors or otherwise. Captain Costin was captain of the State steamer Accomed, but resigned from the service about inspectors or otherwise. Captain Costin was captain of the State steamer Accomac, but resigned from the service about a year ago. Whether these two men, who were the ones appointed, served or not, I do not know, but If any one was appointed or acted as substitute for either of them, it was done without my knowledge, and I had nothing whatever to do with it, directly or indirectly. It is absolutely untrue that I sought to improperly influence any police boat captain, inspector or officer, or any other voter in the county against Mr. Matthews.

At this election nearly all of the voters were at home, and not away dredging, and oystering as they are in general elections, which are held in the full, during the active oyster season.

In conclusion, if Mr. Matthews desires any investigation into any of my acts as voter, citizen, chairman of the State Board of Fisheries, in connection with this election, before the County Committee, the courts of any other proper tribunal, I am ready, willing and anxious that it be had, whenever he may request it. I am tired of refuting trumped up false charges alred through the public press. If Mr. Matthews is making these charges in good faith then it is in his power and is his duty to press the charges in the proper place and maner, and not through the newspapers, and I call on him to do so, and to look more carefully to the truth of his charges before making them.
